

To Whomsoever Concerned.

From: Archayecta Rakshit
Pediatric Fellow,
Elite School of Optometry

Respected Sir/Madam,

It has been my greatest opportunity to get involved in the pediatric fellowship programme provided by the ESO and SN Academy. It has nurtured me through excellence in all aspects of providing pediatric eye care for the past 6 months. I think that it has been one of the best decisions in my life to have had enrolled in the same. It has been my greatest pleasure working with all the ~~Doctors~~ greatest Doctors, Optoms and Employees who work with "Alaya" worship at heart. It taught me so much about deserving nothing than the best by the patient, to treat each patient like that of my own.

There are much knowledge that I acquired from the study programmes.

- 1) Different Syndromes involving the eye like Danes, Browns, Mobius.
- 2) In Low Vision Care:- How to give visual stimulation to Mentally retarded children, give mental support to their family members.
- 3) In Contact Lens:- How to tackle a kid for contact lens, even if he is uncooperative.
- 4) In Binocular Vision Clinic — Learnt different types of diagnosis & their management with Vision therapy, Learnt prism trials in case of diplopia & head postures.
